1x Squeegee
Prepare:

- [ ] Remove all supplies from package
- [ ] Work in a clean, well-lit environment
- [ ] Power off and unplug device
- [ ] Remove any accessories from monitor
- [ ] Watch video: eyesafe.com/install

Clean

1

Use the **Screen Cleaning Wipe** to remove smudges and dust particles.

2

Dry the screen with the **Microfiber Cloth**.

3

Use the **Dust Remover Stickers** across the entire screen. Take your time to remove all dust particles.

Apply

4

Use the **Anti-static Wipe** across the entire **Screen Protector** front and back.
5

On the **Screen Protector,** Hold **Tab A.** Carefully pull **Tab B** to peel away clear backing.
6

Holding **Tabs A and C**, align the **Screen Protector** by centering it over the live area of your display. This may require powering your screen on.
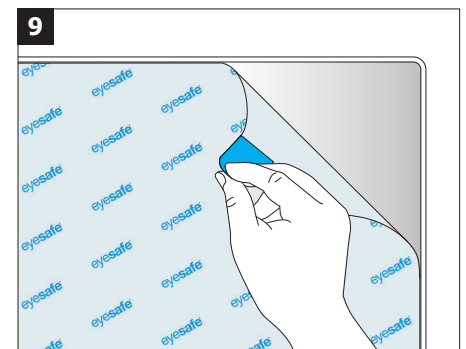

Finish

7

Squeegee along the top edge and down the center of your screen. Allow the **Screen Protector** to adhere to the entire surface. Power off the screen if it was powered on in Step 6.

8

Use the **Squeegee** and with smooth downward strokes, push bubbles to edges. Caution: pressing too hard will damage the screen protector.

9

Pull **Tab C** to remove top mask. Press out remaining bubbles with your thumb. Use the **Microfiber Cloth** to remove fingerprints.
